

Equalizer Systems, a division of Days Corporation, has been a part of the local economy for 105 years. What began as a delivery service in 1913 has grown into a multidivisional corporation providing products and services to various industries. Equalizer Systems manufactures hydraulic lifting and leveling systems for horse trailers, motor homes, fifth-wheels, and specialty vehicles. Over the past few years we have increased our investment in people and equipment to bring a comprehensive manufacturing environment inhouse to more successfully support our growth. We are currently searching for a **Design Engineer** to help us move forward while continuing to provide our customers the high level of service and products they have come to expect.
